DETAILED ACTION

Status of Claims

1. Claims 2-9 and 11 are cancelled in view of the amendment filed on 2 September 2004.

Claims 1, 10, 12-36 remain under examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 10, the claim limitations on "l" (i.e. "...l and n may be zero" and "wherein l is zero") are confusing. It is self-contradictory that "l ... maybe zero" and "l is zero" are in the same claim. Therefore, claim 10 is indefinite.

Claim Objections

4. Claim 25 is objected to because of the following informalities: The component numbering in claim 25 does not start from A, which is inconsistent with the rest of the independent claims. Appropriate correction is required.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1742

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 10, 12-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sako et al. US 4,954,372(Sako) in view of Japanese Patent JP 06-116527 A(JP '527).

The teachings of Sako and JP '527 are discussed in the previous Office Action (See paragraphs 3 and 5).

With respect to the amended claims 1, 10, 25, 31 and 35-36 of the instant invention, the amended limitations are contained in the original claims 10 and 36. Therefore, the amended claims 1, 10, 25, 31 and 35-36 are rejected for the same reason as stated in paragraph 2 of the previous Office Action.

Response to Arguments

7. Applicant's arguments filed 2 September 2004 have been fully considered but they are not persuasive.

In the remarks, the applicant argues that

- (a) the applicant's claims are directed to a hydrophilic polymer that does not contain at least 40 number % of acrylamide moieties as disclosed by Sako, and
- (b) there is no teaching or suggestion by JP '527 to use the hydrophilic non-ionic functional group containing the claimed polymer.

8. In response to applicant's argument (a) that the references fail to show certain features of applicant's invention, it is noted that the applicant's asserted features (i.e., hydrophilic polymer that does not contain at least 40 number % of acrylamide moieties) are not recited in the rejected claim(s). Although the claims are interpreted in light of

the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

9. In response to applicant's arguments (b) against the references individually (i.e. JP'527), one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Furthermore, the applicant is reminded that JP '527 is a secondary reference to be incorporated into Sako. The motivation to combine Sako with JP '527 is provided in paragraph 2 and 4 of the previous Office Action.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
